

Lightweight Steel & Timber
Truss Manufacturers

Since 2000, Dezzo Roofing has supplied over three and a half million square metres of lightweight steel trusses for projects completed in South Africa, and the African continent.

OUR VISION

To be the supplier of choice for all homeowners, developers and contractors, while performing with honesty and integrity at all times.

Why choose Dezzo Roofing?

- Countrywide delivery at no additional cost
- Guaranteed lead time
- Accredited installers nationwide
- Competitive pricing
- State-of-the-art facilities
- Over 200 000 roofs in 22 years
- Owner managed
- Great roofs - because it's all we do.

Dezzo Roofing specialises in the manufacturing and supplying of lightweight steel roof support systems - a viable and cost effective alternative to conventional timber roof systems. We have been involved in numerous projects across the country, ranging from residential houses, rural schools, social facilities, hotels, factories, army barracks and office buildings.

Dezzo Roofing manufacture and supply steel and timber roof trusses, and are dedicated to delivering excellent service, time and again. With state-of-the-art facilities and a project portfolio spanning across South Africa, Africa and Indonesia, we have the expertise to tackle any project.

STEEL TRUSSES

As one of the first companies in South Africa to pave the way towards lightweight steel roof trusses, we are proud to be considered industry pioneers. Steel has become a viable and more cost-effective alternative to traditional timber roof trusses.

Advantages of steel roofing:

- Long-lasting
- Lightweight
- Can be fabricated in any pattern or configuration
- Stronger and can withstand heavy weather conditions
- No risk of ant or insect infestation
- Fire-resistant
- No length restrictions, sections can be cut to length (minimising wastage)
- Easy to transport
- Faster manufacturing therefore faster turnaround time

TIMBER TRUSSES

In 2002 we started manufacturing treated timber roof trusses, initially for the RDP market. We now also focus on the middle to upper-income residential market, as well as schools, office blocks, and smaller commercial requirements.

As an approved Mitek manufacturer with a modern truss processing plant, we are equipped to successfully complete a range of projects with a great variety of specifications.

SEAMLESS GUTTERS

Residential | Commercial | Industrial
MOBILE UNIT FOR ON-SITE MANUFACTURING

DR Seamless Gutters offers quality rainwater collection systems to help maintain your roof. Enjoy a modern and beautiful looking design with a seam-free aluminium construction.

I have been working with Dezzo Roofing for approximately 4 years now. I've always found their service to be good and their representatives to be friendly. They're ranked as one of the best for the job and I have no issue recommending them. **Richard Ellis, Slingshot Investment**

Thanks for the great service you guys at Dezzo are giving me. Your quoting gets done promptly, pricing is competitive, and delivery is always as promised. Keep up the good work. **Bruce Sommerville, Allround Builders**
